Re: California Water Plan Update Comments (as an interested party)

1. I request that the urban area of Southern California (the South Coastal Plains area) be recognized and dealt with as a focused reporting area (as identified in the table of contents).
2. I request that the supply of water be reported on a "reliable source of water" basis.
 - a. And that the normal flow status of the Colorado River be the basis for reporting MWD's reliable source of priority 4 water. (Apportionment and entitlement water are based on normal flow.)
 - b. IID's transfer to MWD is of priority 3 water.
